Lm160 & Lm165

Ultra Sensitive 1.4 Megapixel Mini USB 2.0 Camera

EXview HAD Global Shutter CCD

Lumenera's Lm165 digital camera is designed to be a compact, cost-effective, versatile solution for machine vision, 3D biometrics and low light imaging. The fully global electronic shutter, which looks and feels of a mechanical shutter, that can capture images of high speed motion with little to no blur and this camera provides many of the features needed for stop motion image captures. Combine this with the ultra high sensitivity and high dynamic range and you get a versatile camera that can be used in the most light challenging applications.

High Dynamic Range in Low Light Applications

This camera utilizes its high quality CCD sensor to its maximum by providing either vivid color or highly sensitive visible light and near IR monochromatic images. Full streaming of uncompressed video along with still image captures are easily controlled through a set of stable and reliable USB device drivers. Region of interest and binning modes allow the camera to run at faster frame rates (30+ fps at 640x480 resolution) while only providing the image data you need. Image capture synchronization is achievable using either a hardware or software trigger and is complemented by 32MB of on board memory for frame buffering to ensure delivery of each image to your application.

Small Size and Locking Connectors

The compact design of the Lm165, measuring 44x44x56mm, make it ideal for installation in small spaces or in compact enclosures. The fully locking USB 2.0 cabling and digital interface ensures a simple plug and play installation – and one standard cable minimizes camera clutter. No frame grabber required. Simplified and economical IO cabling is provided through a locking RJ45 connector supporting 2 optically isolated ports (1IN/1OUT) and 3 configurative bi-directional I/O ports.

Write Your Own Vision Application

The Lumenera Camera SDK provides a full suite of features and functions that allow you to maximize the performance of your camera within your application. The SDK is compatible with all USB and GigE based cameras. Microsoft DirectX/DirectShow, Windows API and .NET API interfaces are provided allowing you the choice of application development environments from C/C++ to VB.NET or C#.NET. Full inline IntelliSense autocompletion and documentation is provided with the .NET API interface and is accompanied by a full API manual describing all the camera functions and properties.

Any Questions?

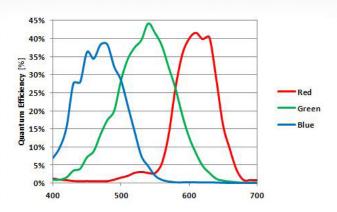

All Lumenera cameras are supported by an experienced team of technical support and imaging experts. We understand your imaging needs and are here to help you get the most out of your camera.

Features

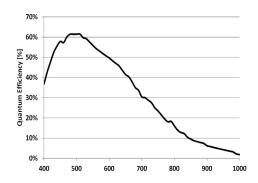

- Small form factor measuring 44 x 44 x 56 mm
- High quality Sony HAD ICX205 CCD sensor
- Color or monochrome, interline transfer, progressive scan 1.4 MP CCD sensor
- Locking industrial mini USB and RJ45 GPI/O connector for control of peripherals and synchronization of lighting
- 3 software configurable bidirectional I/O ports and 2 optically isolated ports (1in/1out)
- 32 MB RAM frame buffer
- Excellent sensitivity
- Simplified cabling video, power and full camera control over a single mini USB cable
- 8 mounting points
- Binning and Region of Interest (ROI) options improve sensitivity and provide higher frame rates
- FCC Class B, CE Certified
- Select 8 or 12-bit pixel data
- DirectX/DirectShow compatible
- Software compatible with Windows 10, Windows 8.1, Windows 7, Linux, 32 and 64bit operating systems
- Complete SDK available
- Three (3) warranty
